## Experience

**iOS Software Engineer**                    **June 2018 to March 2019**
Frogshop, LLC, Newark
- Tasked with full creative control of developing the minimum viable product to jump start beta-testing.
- Designed and developed a functional mobile SaaS B2B app using Xcode while teaching myself Swift 4.
- Implemented the application's database using the Google Firebase API.
- Lead communication with the Android dev team to be on the same page for both versions of the app.
- Managed codebase using Git.

**Python Coding Instructor**                    **March 2017 to December 2017**
MNH Academy, LLC, Englewood
- Taught and instructed students ages between 10 – 14 the basics of programming using the Python programming language.
- Directed a 12-week program where students would get introduced to the basics of programming such as variables and data types and would ultimately learn how to create drawings using the Python Turtle framework.

## Projects

| | |
|---|---|
| Reddit Bot | Implemented with PRAW framework, written in Python. |
| Automatic Grader | CURL requests to autograde blocks of Python code, written in PHP. |
| Spellchecker | Utilized regex and stacks, written in Python. |

## Technical
